

SCIENCE FOR CLASS V

ASSESSMENT-II

A. Tick the correct answers

1. (b) Tiny hole
2. (c) Vulture
3. (d) Evaporation

B. Write T for True and F for False for the following

statements. Rewrite the false statements correctly:

1. True
2. False. The potato reproduces new plant from the buds on their eyes.
3. False. Animals that eat both plants and flesh of other animals are called Omnivores.

C. Circle the odd ones:

1. Horse
2. Pistil
3. Rose

D. Look at the given picture and answer the following:

1. Ans. (i) no picture shows the arrangements of molecules in solids , these are closely packed whereas (ii) no picture shows the arrangement of molecules in gases. These are very loosely packed.

2. Ans. (i)-Solid (ii)-Gas

3. Ans. Example of solid – book Example of gas-oxygen.

E Name the following:

1. Pollination

2.Solid

3. Dispersal of seeds

4. Scavengers

F. Answer the following questions:

Ans 1) Monosexual flower- The flowers that contain either pistil or stamens are called monosexual flowers. They are also called unisexual flowers. Ex- papaya, pumpkin, watermelon etc.

Ans 2)

CONSUMERS	PRODUCERS
1. The living organisms that cannot prepare their own food and depend on plants directly or indirectly for food.	1. The living organisms that produce their own food .
2. The depend on plants for their food.	2.The prepare their own food by the process of photosynthesis.
3. Example- human being, animals	3.Example- All green plants.

Ans 3) Sea Breeze- A coastal breeze blowing from the sea towards the land is called sea breeze.

It occurs during the day when land gets heated, air above the land becomes hot and lighter. It rises up and cool air from the sea rushes in to take it's place.

Ans 4) Answer key with reference to exercise of chapter 9 (pg -80/81)

Write all the answers in your science copy by writing today's date .
